Microsoft Office (Excel, Word)

Martijn van Os

I take pride in my hard work. The thing I hate most is letting myself and others down, so I will go to great extend to not let that happen. Most importantly however, I do it all with a smile.

Education

Master's programme in Information Sciences

Sep 2020 – Jul 2022

Radboud University, Nijmegen

During this Master's programme, I learned about how businesses can take full advantage of different IT systems and data. I also gained experience in entrepreneurship and managing IT projects. This programme is very interesting and challenging, and the things I learned are of great use for future employers. With my knowledge, one of the hurdles a company can overcome is the gap between management and IT or more successfully complete IT projects.

Minor 'Informatica en Informatiekunde voor Economie en Bedrijfseconomie'

Sep 2017 – Jan 2020

Radboud University, Nijmegen

To complement my Bachelor's programme in Financial Economics, I took extra courses in computer and information science. I acquired knowledge and skills in Databases, Programming (Java), Security, and Requirements Engineering.

Bachelor's programme in Financial Economics

Sep 2016 – Jan 2020

Radboud University, Nijmegen

Financial Economics is the study of financial markets and its importance in macroeconomics. Some examples of topics I have learned about are the foreign exchange markets, international trade, accounting, and economic policy.

Work Experience

Junior Business IT Consultant

Feb 2020 – current

TLA Advies / Stolwijk Kelderman – Doetinchem/Zevenaar

I started working here right after I finished my Bachelor's degree to fill in the gap before I would start my Master's. I worked on a big project that would centralize data of clients and make the auditing process for clients much faster, easier, and with less mistakes. I enjoy working here a lot, and therefor decided to work part-time together with doing my Master's.

At TLA Advies I got my first experience with Microsoft Power BI. I designed a report that takes all the repetitive work of accountants out of their hands, so they can focus on auditing and advising clients. No more need to manually convert Audit Files to Excel and to create pivot tables and formulas. My report automatically called data from a local server that my team and I designed.

Shift leader

Oct 2015 – Sep 2018

Domino's Pizza – Oosterhout (NB)

I was hired as a pizza baker at Domino's Pizza, and after six months promoted to shift leader. With my experience at Jumbo and the speed at which I learned new skills, I was a good fit for this position. I learned to work under intense time pressure, how to take the lead to work as a team, and to take responsibility.

Shift leader

Sep 2013 – Sep 2015

Jumbo Supermarkten – Oosterhout (NB)

I started as a stock clerk at Jumbo. As I quickly learned new skills and completed all necessary trainings and tests, I was promoted to shift leader. During my working shifts, it was my job to make sure all tasks were done by the stock clerks in a timely and decent matter, as well as being the point of contact for customers with questions or complaints.

Side Activities

Treasurer

Sep 2018 – Sep 2019

Pecunia Causa – Nijmegen

Pecunia Causa is a student association for students who are interested in macro-economic affairs, the stock market, and stock trading. My job as a treasurer was to prepare a portfolio overview each meeting, discuss current events in the stock market and manage our bank- and portfolio accounts.

Member Youth Council

Sep 2015 – Okt 2018

Rabobank Amerstreek – Oosterhout NB

As a member of the youth council of the Rabobank I got to participate in the conversations between the Rabobank and its members, discussing certain hurdles the bank needed to overcome and required input on, giving feedback on decisions the bank made, and organizing an event for people who are interested in buying their first home or starting their first business.
